

I wanted to write and implore you to not pass the nabs petition 04-160, I drive over several thousand miles a week, I find xm radio to be great for me, I listen to the weather and traffic channels a lot as I drive all over the country, I truly enjoy the music formats and the large variety of shows, talk, music etc, I can start a trip in new york and finish in Mississippi as I did the past week and listen to the same programs uninterrupted, Listening to xm helps keep me informed and alert, I also have xm in my home, as I really enjoy the no commercials, and the great programming, just because the radio stations are losing ground to satellite radio, too bad that is competition, don't try to legislate more rules, we have enough government regulations and big brother activity already, why ruin a good thing like xm which is growing leaps and bounds weekly, thank you...john meyers
